

ACQUIRING SKILLS FOR YOUNG PEOPLE LIVING SLUM COMMUNITIES OF JINJA CITY UGANDA.

We are a community Based-nonprofit organization, Mandated to operate in slums of Uganda-urban centers. We are raising money to support and clearly bring out the vision and mission of the organization of engaging the unemployed and school dropout young population living urban slums to acquire technical skills(computer Training, Tailoring, hair dressing and Welding) to make them start their own jobs to prevent unemployment and its problems in these poor areas. This donation will be used to expand the room, that we are currently occupying, buy more computers, machines, and equipment so that we provide more than hands on -than theory. Any time so long as it will be for taking our organization goals to achievement and help our communities(slums) not to be violent. there fore in a period of one years is not bad. One can donate a skill , like a volunteers can train our young people. Possibly we are not focusing on money only. Thanks! Sabirye Latif- CEO+256 705608472
