

## EARTH DAY 2019 FUND

Give Today to Change Tomorrow Loaded with new awareness, facts, and knowledge over 50,000 people have attended an Earth Day Fair in San Luis Obispo County since its first one on April 22, 1990. Motivated and activated by this single event, minds have been influenced and positive behaviors have become permanent and passed on to family, friends and associates, making Earth Day an experience that never stops giving. Help Earth Day Alliance reach thousands more, and continue the tradition, by giving to the 29th annual Earth Day Fair. The planet is experiencing harmful environmental changes partly brought about by humans. Our mission is to strongly urge and motivate children, teens, adults and seniors to turn it around through small or large green actions. We believe one person can make a difference. Like many environment related projects, Earth Day SLO is an endangered event. We rely on volunteer energy to make it happen and count on grants, fees, and donations to cover expenses. Show us that Earth Day plays an important role in our community. Assure us that we are on the right track and that the community is willing to invest in this free, fun, educational community event by making a donation. Spread the word -- bring family and friends -- be the change you want to see in the world. Donate, volunteer, or attend Earth Day SLO.

### Donation
