

HELP ME GET BACK MY SELF ESTEEM, SUCCEED ACADEMICALLY & IN SOCIETY WITH TREATMENT FOR TRAUMATIC BIRTH INJURY

My grandson, my daughters son needs to have some Chiropractic, Occupation Therapy and Behavior Therapy to help him heal from an injury that he obtained through a Traumatic Birth. He is a wonderful big brother, but his self esteem is dwindling as his little brother is learning to do things faster than he is. He takes pride in being a big brother and this and his struggles academically is really causing low self esteem and frustration. We want to heal him with as minimal of medication as possible to get him up to his current grade level academically, strengthen the weak side of his brain, increase his fine and gross motor skills so we can enjoy his wonderfully loving spirit. Be apart of a Miracle for him so his processing will improve and he won't have to work so hard to learn only 5% of what he is trying so desperately to get. He is such a sweet spirit I am sure that he well become a major contributor to make a better community for years to follow if given this opportunity.
