

HELP WITH TAHJ OUTSTANDING MEDICAL EXPENSES AND HEALING

Please help Tahj with medical expenses and healing. He suffers from Gastritis an inflamed or erosion or irritation of the lining of the stomach. Bile reflux, and infection. Helicobacter pylori, a bacteria that lives in the mucus lining of the stomach. Without treatment the infection can lead to ulcers and sometimes stomach cancer. Just before surgery his medical insurance expired. Because of this chronic illness my son was not able to continue high school publicly. The only other option was to enroll him into the home school. Tahj was always active. He is such a good kid and is very humble. Funding this campaign will get him back to health and enhance his quality of life again. #thankyou.
