

MARCH FOR SCIENCE

- IOWA -

MARCH FOR SCIENCE IOWA

We want to ensure that scientific integrity plays an important role in government decisions that affect everyone, from funding through policymaking and regulation recommendations. We feel the best way to do that is by highlighting the vital role science plays in our lives, including in our democracy. We want to help scientists and the communities they serve to work together in improving science education, communication, and access. So we are holding a March and Rally to coincide with the March and Rally on the national mall in DC on April 22nd. The march is a nonpartisan effort to stand up and defend science against those who deny its findings and who try to silence them, as well as an attempt to connect people with scientists through teach ins that will be happening on the capitol complex. This is for anyone and everyone who supports science regardless of political background. The funds we raise will go toward paying for permits, portapotties, security, audio visual equipment and everything else we need to have this demonstration, and will be going through our fiscal sponsor to ensure you have a tax deductible donation. Additional funds will be distributed to the sister marches throughout the state to pay for all their needs as well, anything left over will go toward further advocacy for scientific literacy. We need to have the money by the end of April to ensure we can pay our vendors. We appreciate and thank you for anything you can contribute, we really appreciate any contribution. Thank you. For press inquiries please contact press@marchforscienceiowa.org To volunteer please contact volunteer@marchforscienceiowa.org For any other questions please contact
