

MARCH FOR SCIENCE

San Luis Obispo

———— EARTH DAY ————

APRIL 22, 2017

MARCH FOR SCIENCE - SAN LUIS OBISPO

In solidarity with marches across the country, our goal for the March for Science in San Luis Obispo is to raise awareness of the importance of science in addressing society's largest and complex issues. We plan to channel the momentum from this national movement towards local events and initiatives supporting science education, research, and policy. This march is being planned by a few passionate SLO locals who want to provide an opportunity to build solidarity around the many science-related issues facing our national and local communities. To ensure a successful event, we need your help! Cooperating with the city requires that we secure permits, insurance, and park reservations. Please consider donating to help cover our costs. \$470 - Emerson Park Reservation \$310 - Event Insurance \$80 - SLO City sidewalk permit \$200 - signage \$100 - PA system \$100 - lab coats for SLO county high schools \$340 - Incidentals and surprise costs (if we have extra funds, we will donate to a local science-related charity. Any extra funds will be communicated via Facebook, and we will solicit recommendations from marchers.) Total: \$1,500.00
