

CURE NARCOLEPSY

MEDICALERT SERVICES

I am diagnosed with narcolepsy with cataplexy and as of late I have been having a lot of complications with it and my environment, which I cannot get out of causes a lot of issues with it. The people I love with have no clue in really what to do when something happens and I was just in the ER the other night because they thought I was seizing, as did the police and paramedics because no one knew what was going on. I seen today about Medicalert bracelets and services and being a single dad to 2 daughter's and paying for a place to live only on my SSI income, I cannot afford to pay out right for bracelet or services. Any help would be greatly appreciated.
